GreasePack #3 EOD

Soil/Soilless	VEG			Bloom								
Every Other Day Per Gallon Hand Feed	Veg Day 10-11	Veg Day 15-20	Veg Day 20	1 Early Bloom	2 Early Bloom	3 Early Bloom	4 Mid Bloom	5 Mid Bloom	6 Mid Bloom	7 2 wks B4 Flush Late Bloom	8 Week B4 Flush Late Bloom	9 Flush Days 3-7
Enhance MC			0.5mL	0.5 mL	0.5 mL	0.5 mL	0.5 mL	0.5 mL	0.5 mL			
GLB Micro DS			0.3 mL	0.3 mL	0.3 mL	0.3 mL	0.3 mL	0.3 mL	0.3 mL	0.3 mL	0.4 mL	
Bloom Accelerant PK				2 mL	2 mL	2 mL	2 mL	2 mL	2 mL	2 mL	2 mL	
Brix 57						2 mL	2 mL	2 mL	2 mL	2 mL	2 mL	3 mL
GLB Roots2Shoots	0.5 mL	1 mL	1mL	1 mL	1 mL	1 mL	1 mL	1 mL	1 mL	1 mL		
Roots2Shoots	*Roots2Shoots can be cut after a few waterings if don't want rootbound pots and restarted Day 21 Flower The Amino Acid Nitrogen in Roots2Shoots may make your plants greener than you like, you can lower or cut out, but the longer you can keep in the more it helps with quality & secondary metabolites.											
Too Much Nitrogen	You do not want too much nitrogen going into flower but additional N will be needed when starting Brix57.											
Micro DS	Many Strains-can handle an additional 0.05-0.1 ml(test at 0.05 mL increments) week before Flush											
Full Line of Nutrients	Amendment doses to be used with any other companies full line If using other Sugars be careful of Guttation.											
Brix57	Guttation which is an expression of xylem sap through the leaves that looks like honey. It is not harmful but it will contain sugars and when smoked can have the potential to carmelize											
Soil Growers	If using soil you can cut everything with 7 days left and use just brix and water											
Coco/Peat Growers	Drain To Waste -If using medium other than soil you can start Brix57 flush with 3-4 days left
